About the Conference

In recent years, soft computing is playing a prominent role in finding optimal and sustainable solutions, where it deals with uncertainty, imprecision, and approximation to leverage robust and optimal solutions into existence. Soft computing is emerging as a combinational paradigm by integrating a set of methodologies and techniques such as artificial neural networks, fuzzy logic, fuzzy neural networks, expert systems, and genetic algorithms that are commonly used to build intelligent, automated and secured systems. Nevertheless, this 3rd International Conference on Soft Computing for Security Applications [ICSCS 2023] will offers a wide area by covering all domains of soft computing. The journal invites the findings and research work related to the application of soft computing techniques for security, optimization, and decision support. The main aim of ICSCS 2023 is to promote Soft Computing [SC] techniques such as fuzzy logic, neural network, support vector machines, evolutionary computation, machine learning and probabilistic reasoning to solve various real-time challenges.

About the College

Dhirajlal Gandhi College of Technology (DGCT) was established in the year 2011 with a mission of creating conducive learning environment, where the students can explore new frontiers and expand their horizons enriched with professional ethics, values and can enhance their knowledge to participate in the challenges of advanced engineering fields and can make them as a good professional. The Institution has one of the best infrastructure facilities for an engineering college which facilitates the wholesome growth of students. DGCT boasts of 10.18 acres of lush green campus on Salem-Bangalore highway, near the Salem Airport providing the right ambience for students to pursue high level of technical education. The calm, serene and tranquil environment invigorates the mind and provide peaceful learning environment.
